Nite Ize

Connect Case for iPhone 4/4S and Mobile Mount
£24.95

Smartphones are a must-have in today's world. I need to stay connected and I increasingly use my iPhone 4S in the great outdoors as well as in the office.

It's a pretty vulnerable bit of kit, so I need a robust case to protect it while allowing me to use the phone without having to extract it from its housing. And that's where Nite Ize's Connect Case and Mobile Mount comes in, available in the UK from Whitby & Co. It's a slim and lightweight cover made from high grade shatterproof polycarbonate that will protect your phone from wear and tear and safeguard it from knocks. You simply

slide the phone into the case and the top clips over the handset to secure it.

The case, available in orange, black, silver, and blue, comes with a transparent screen protector to save the screen from scratches and smears but you can still use all the functions. It has a removable clip to that allows you to attach your phone to your belt, pocket or any other strap. Or if you want to use your phone when on your bike, either to see when someone's calling or to use the GPS on trails, you can use the Mobile Mount to clip it on to the handlebars. It simply clips

to the back of the case and the wrap-around gear ties secure it to the bike. So my beloved iPhone is now always with me, ready on the go. You can also buy the Connect Case and Mobile Mount separately if you don't want both (£19.95 and £9.95 respectively). PJ
