

# CAMJAM™

## Adjustable Micro Bungee

### Locking down smaller loads is a cinch with the adjustable CamJam Micro Bungee.

Lightweight, easy to use, and designed to lock securely into place with a simple pull of its attached bungee cord, the adjustable CamJam Micro Bungee makes securing smaller bundles a literal cinch. Made of sturdy, durable plastic, its carabiner clip features a stainless steel gate on one end and a rotating ridged cam mechanism on the other. Both ends of the stretchable, reflective 14" bungee cord are capped to keep them securely attached to the CamJams on either end. Loop the bungee cord around the load you're bundling then pull the ends of the cord through the cam to adjust to the desired tension. Or, clip the carabiner clips to two fixed points, and adjust desired tension to secure your item. Let go and it locks into place and stays that way, until you release it by pulling the bungee upward out of the cam, or by rotating the cam open. Excellent for securing small loads to a backpack or bike rack, hanging a tarp, or bundling small gear.

- ⊕ Includes 1 x 14" section of highly reflective 0.012" | 3mm bungee cord along with 2 attached CamJam Cord Tighteners
- ⊕ Adjustable length: 3.5" to 14" | 9cm to 35.6cm
- ⊕ Lightweight, strong construction
- ⊕ Product weight: 0.49 oz | 14 g
- ⊕ Product dimensions: 14" x 2.3" x 0.4 | 355.60mm x 58.42mm x 10.16mm

**WARNING:** Read product safety information and instructions prior to use. Safety precautions should be taken in the use of all stretch cord products. Inspect product before each use. Product with cut, frayed, or otherwise damaged cords should not be used. Product with damaged or deformed hooks should not be used. Do not use on sharp or abrasive surfaces. Clips should be attached to allow the clip gates to fully close - do not attach the clips by the tip, or in any other manner that would not allow the gates to fully close. Eye protection should be worn during the use of this product. Stretch cord carefully, keeping body parts out of the path of possible rebound. Do not pull cords directly toward or away from yourself or other individual. Do not stretch cord more than 50% of its original length. Overstretching cord can cause hook or cord failure resulting in uncontrolled release. Uncontrolled release can cause severe injury to unprotected body parts, particularly eyes. Keep out of reach of children. Not to be used for climbing. Manufacturer is not responsible for loss, injury, or damage due to improper use of product.
