

INOVA[®] MICROLIGHT UV

The INOVA Ultraviolet Microlight is an ingenious, precision engineered micro UV flashlight. It's great for detecting counterfeit bills/IDs, spotting fluorescent dyes or leaks during auto or HVAC repairs, even during hunting or crime scene investigation. If you need UV light for your hobby or profession then you know that it has a multitude of additional uses. From its tough polycarbonate construction to its multi-function switch mechanism and powerful UV LED Lamp, the Microlight UV offers advanced design and engineering in a micro size UV flashlight. The Microlight UV also features four lighting functions, a water and crush resistant body, plus a stainless steel universal clip that easily attaches to key, zippers, backpacks and any number of convenient locations.

FEATURES:

- High-Powered UV LED bulb - 1,000 hour life, 365-400 nanometer wavelength
- Four Functions
 - High power - Low power - Strobe - Signal mode
- Temperature Operation Range from -20° to + 40°C
- Battery Type: 2-2016 Lithium Batteries Included
- Dimensions: (Height x Length x Diameter): 1.85" (4.7cm) H x 1" (2.5cm) W x .325" (0.8cm) D
- Weight: 0.36oz. (0.21g)
- Easy-Open/Snap-Shut Construction for easy battery replacement
- Durable Stainless-Steel Universal Clip attaches securely and releases quickly
- Try me packaging - allows for lighting demonstration
- Limited Lifetime Warranty USA

SAFETY PRECAUTIONS

Protect your skin while using this leak detection light. Exposure to UV radiation can be harmful to your health. This light radiates intense ultraviolet (UV) light when operated, and most of the UV light emitted is not visible. Wear appropriate eye protection that blocks UV light. Do not look directly at the light during operation. Exposure to UV light, even for a brief period of time, can damage your eyes.
