

CONNECT CRADLE™

Universal - Mobile Device Holder

The Connect Cradle Universal fits nearly any size mobile device, with or without a case. It easily connects to a car dash vent and can also be used as a table top stand, creating convenient hands-free usage wherever you go, throughout the day. In other words, it puts the "universe" in "universal."

The Connect Case Universal Mobile Device Holder is a versatile way to create multiple docking stations for your cell phone in your car, home, and office. With a few quick twists of a flathead screw, you can adjust it to perfectly fit nearly any sized mobile device, including iPhones and Androids. The top and bottom adjustable dipped rubber grips create both cushion and friction, so the Connect Case Universal snaps easily and securely around your phone, even one that's already in its own case.

The two durable, flexible Gear Ties on the case's top and bottom configure in a multitude of ways. Bend the top Gear Tie arms and insert them into the dashboard vent of your car, so you can view maps, follow your GPS, or activate Siri, without juggling or fumbling with the phone in the process.

When you've reached your destination, the Connect Case Universal easily detaches from the car, and the bottom Gear Ties can be bent to create a new docking station on your desk, table, or countertop—basically any smooth flat surface.
