

SLIDELOCK™

CARABINER

The SlideLock Carabiner provides convenient attachment with a locking gate. It's the classic carabiner with a Nite Ize innovation!

At Nite Ize, we believe no product is too small or basic to be improved. Exhibit A: the classic utility carabiner. We took a hard look at this ubiquitous device and saw two good opportunities to make it more efficient. We designed an innovative slide-to-lock feature that securely locks the gate with a simple push and slide movement, and unlocks when you want it to just as easily. Then, instead of a bulky tubular construction, we designed a cross sectioned, rectangular stainless steel body that's durable, low profile, and slim; it feeds more easily through smaller openings and rests flat in pockets. Available in two sizes: #4 (perfect for attaching to a belt loop or backpack to carry larger items.) and #2 (for carrying smaller items like keys, and attaching to zipper pulls).
